

Where Experience and Quality Count A New Approach to Federal Healthcare Staffing

A New Approach to Federal Healthcare Staffing

Medical Mission Essential Services

GPA-HRSA, Inc., a small business, offers heightened workforce solutions to support Federal Hospitals, Military Treatment Facilities (MTFs) and clinics.

GPA-HRSA carefully selects high performing physicians, nurses, and ancillary personnel with the skills, training, and personal commitment to quality patient care and ultimately, your healthcare program's success.

Our team has a broad background working within the medical industry, bringing an intimate knowledge of operational pain points such as budget constraints, retention, and rapid placement requirements. This insight, coupled with a made-to-measure customer approach, positions us among a select few staffing organizations with the insight to provide exceptional mission support.

Healthcare Worker Services

We provide medical professionals in a broad range of labor categories-ranging from Laboratory

Technicians and Nurses to Neurosurgeons. All of our healthcare professionals are properly credentialed, meet appropriate security requirements, and have the requisite expertise to excel within an assigned contract.

Program and Personnel Management

Program and Medical Personnel Management

Our management approach does not follow the “fill-and-bill” model employed by many staffing agencies. GPA-HRSA understands that each facility, outpatient clinic, or healthcare program has unique requirements and challenges. Finding just the right professionals to fill each position is only one piece of the puzzle. Providing the appropriate program oversight through a stringent management system such as our Medical Personnel Management Information System (MPMIS) is critical to recruiting and retaining the highest caliber of HCPs to meet your mission needs and ensure outstanding patient care.

A Unique Medical Partnership

GPA-HRSA was formed as a partnership between the G4i Development Group, Inc. and the Ponce School of Medicine (PSM) University of Puerto Rico in 2010. The company was founded in response to the ongoing challenges faced within Federal healthcare to find highly qualified healthcare personnel on a consistent basis. Through this unique relationship leveraging G4i’s industry best practices and the Ponce School of Medicine’s Institutional networks, we are able

to quickly identify and place both new graduates and experienced HCPs within the Federal healthcare community.

Built upon a foundation of knowledge, GPA-HRSA brings innovative healthcare staffing solutions that stay ahead of the rapid changes impacting government medical programs-and exceed our customer’s expectations.
